

SEG FABRIC GRAPHICS INSTALLATION

SEG FABRIC GRAPHICS INSTALLATION

- 1 Insert the gasket into **only** the corners of the frame.

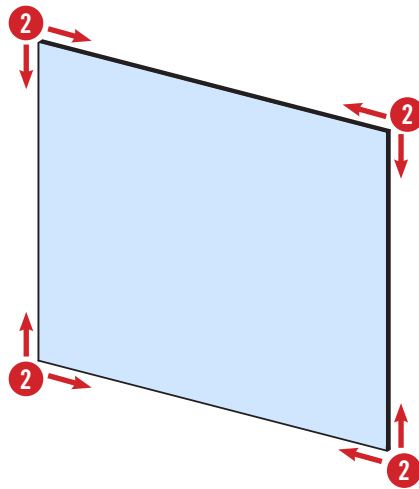

- 2 **CRITICAL:** Start from each corner and work towards the center of the frame to evenly distribute the gasket in the frame channel.

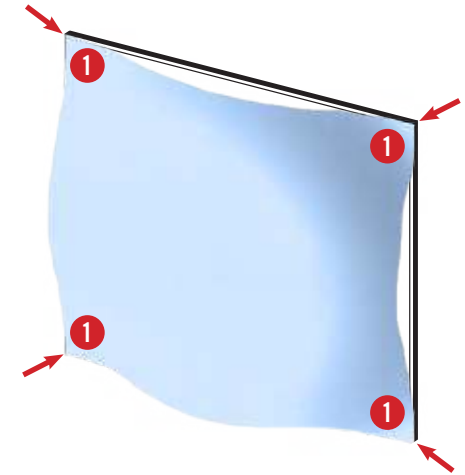

DO NOT start at one corner and work in one direction across the frame as this will stretch the gasket and bunch the fabric.

Graphic not fitting?

Try re-adjusting your frame assembly then re-fit graphic, corners first.
