**WE ARE PLACE MAKERS™**

## “DO I NEED AN ENGINEERING STAMP FOR MY SIGN?”

At Moss, we understand the importance of safety and compliance when it comes to the products used at trade shows, exhibits, and events.

Our commitment to quality ensures you can trust our products to meet your needs. If you require stamped engineering drawings to validate your project's designs and ensure compliance, reach out to us.

**Moss expertise provides you the stamp you need when you need it.**

### STRUCTURES REQUIRING AN ENGINEERING STAMP

#### OVERHEAD & HANGING STRUCTURES

**Size:** 20' or more in any dimension  
*All construction Methods*

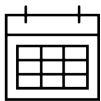

**Frame Type:** All SEG Extrusions / Moss Groove / Construct® / Modular Frame hanging elements

#### SELF STANDING STRUCTURES

**Size:** 12'H or more  
*All construction Methods*

### ACCEPTABLE ENGINEERING STAMPS

#### By Year

A new stamp for each year is no longer required

#### By Manufacturer

If Moss is the primary manufacturer, an Illinois engineering stamp is acceptable

#### By Modification

If a frame is modified a new engineering stamp is required

*These guidelines are formulated based on current information. However, it is important to note that local venue and show management requirements take precedence, superseding these recommendations, and should be referenced to ensure compliance with show rules and regulations.*
